- A. The Peoria Park District wishes to build a trail that is sustainable (low maintenance, low erosion), provides visual interest, and provides a permanent hiking connection between its various bluff properties. Before beginning work, contractor must become familiar with USFS trail construction details in order to properly construct them in the field. Contractor's learning curve should be reflected in bid price, as lack of experience in trailbuilding shall not be used as an excuse for failure to properly construct trail or adapt standard details to field situations.
